Case PM 1322 CIP

Dear Jim:

David Meyer has told me of your interest in filing a continuation in part application adding the spacer concept to the PM 1322 case. I have asked David on his visit with you today to obtain appropriate drawings, sketches and any other available disclosure and inventorship information so that a CIP application can be filed promptly.

It seems to me that it would be desirable to formalize the status of the parent 1322 application before filing the CIP application. I have in mind that the parent application requires correction of inventorship and submission of the signed declaration.

Sincerely,

Charles B. Smith
